

ICpEP.SE QA Feature Testing Checklist

Build/Version: _____ Tester: _____ Date: _____
Environment: Local / Staging / Production Browser/Device: _____

PUBLIC WEBSITE

- ☐ Landing page loads without console/server errors
- ☐ Navbar links scroll to the correct sections
- ☐ Loading screen disappears and page is usable
- ☐ Scroll progress bar updates while scrolling
- ☐ Hero section displays correctly on desktop and mobile
- ☐ About, Manifesto, Board, Teams, Events, FAQs, and Contact sections display correct content
- ☐ Images for board/team/events load without broken placeholders
- ☐ Layout is responsive on mobile, tablet, and desktop
- ☐ Footer links/contact details are visible and correct
- ☐ Edge: slow network still shows usable loading/error states
- ☐ Edge: missing image asset does not break the whole page
- ☐ Edge: very small mobile width does not overlap text/buttons
- ☐ Edge: browser refresh keeps page stable
- ☐ Edge: opening direct section links or hashes does not break scrolling

MEMBERSHIP REGISTRATION

- ☐ Registration status loads from backend
- ☐ Membership form is visible when registration is open
- ☐ Closed registration shows the proper unavailable message
- ☐ Required fields show validation messages when empty
- ☐ Name, email, student ID, section, year level, and contact fields accept valid input
- ☐ Invalid email/contact formats are rejected
- ☐ Formal picture upload accepts valid image files
- ☐ E-signature upload accepts valid image files
- ☐ Invalid file type or oversized file is rejected
- ☐ Successful submission shows confirmation message
- ☐ Duplicate/invalid submission shows useful error message
- ☐ Edge: double-clicking submit does not create duplicate applications
- ☐ Edge: duplicate student ID is rejected for the same active term
- ☐ Edge: duplicate email handling matches expected policy
- ☐ Edge: extremely long names/addresses are rejected or displayed safely
- ☐ Edge: special characters in names do not break saving/display
- ☐ Edge: upload is cancelled or interrupted and user can retry

ICpEP.SE QA Feature Testing Checklist

- ☐ Edge: backend offline shows a clear error
- ☐ Edge: form remains usable after validation errors
- ☐ Edge: closed registration blocks direct API submission too

ADMIN AUTHENTICATION

- ☐ Admin/officer can open sign-in modal from public site
- ☐ CSRF/session initializes before login
- ☐ Valid credentials sign in successfully
- ☐ Invalid credentials show an error and do not sign in
- ☐ Inactive/deleted account cannot sign in
- ☐ User with must-change-password is redirected to change password page
- ☐ Change password rejects weak/invalid confirmation
- ☐ Change password succeeds and unlocks admin pages
- ☐ Sign out clears session and returns to public site
- ☐ Expired session redirects safely to landing page
- ☐ Edge: stale CSRF token refreshes or fails gracefully
- ☐ Edge: browser back after logout does not show protected data
- ☐ Edge: password reset forces password change on next login
- ☐ Edge: changed password invalidates stale sessions as expected
- ☐ Edge: multiple failed logins do not expose account details
- ☐ Edge: direct admin URL access while logged out redirects safely

ADMIN DASHBOARD

- ☐ Dashboard loads after login
- ☐ Member/application counts are correct
- ☐ Payment/revenue cards only appear for roles with finance permission
- ☐ Upcoming events list displays correct event data
- ☐ Empty dashboard states display cleanly
- ☐ Dashboard refresh/polling does not duplicate data
- ☐ Edge: dashboard handles zero members/payments/events
- ☐ Edge: dashboard handles large member/event counts
- ☐ Edge: revenue numbers update after payment status changes
- ☐ Edge: role permission change hides restricted dashboard data after refresh
- ☐ Edge: failed dashboard API request shows non-breaking error state

MEMBER MANAGEMENT

- ☐ Members page loads for roles with members.view
- ☐ Unauthorized roles cannot access member list

ICpEP.SE QA Feature Testing Checklist

- ☐ Term selector loads available membership terms
- ☐ Member filters/search return correct results
- ☐ Pagination works without skipping/duplicating rows
- ☐ Member detail page displays profile, payment, files, and metadata
- ☐ Edit member form saves valid changes
- ☐ Invalid edit data shows validation messages
- ☐ Delete/archive member works and removes from active list
- ☐ Restore member works from trashed/archived state
- ☐ Bulk actions apply only to selected members
- ☐ Edge: search with no results shows empty state
- ☐ Edge: filters combined together return accurate results
- ☐ Edge: changing term while a request is loading does not show stale data
- ☐ Edge: editing archived/deleted member is blocked or handled correctly
- ☐ Edge: concurrent edits from two admins do not silently lose important data
- ☐ Edge: invalid member ID shows not found/unauthorized state
- ☐ Edge: member details still load if optional fields are blank
- ☐ Edge: bulk action with zero selected members is blocked
- ☐ Edge: bulk action on mixed paid/unpaid members behaves correctly

PAYMENTS AND REGISTRATION TERMS

- ☐ Toggle paid/unpaid updates member payment status
- ☐ Payment transaction/history is created after payment changes
- ☐ Payment History page loads for finance.view roles
- ☐ Unauthorized roles cannot see payment history
- ☐ Payment filters/search/date ranges return correct results
- ☐ Year level and term data are shown correctly in payment records
- ☐ Create membership term works with valid data
- ☐ Activate membership term changes current active term
- ☐ Opening registration allows public submissions
- ☐ Closing registration blocks public submissions with reason
- ☐ Registration settings persist after refresh
- ☐ Edge: toggling payment twice creates correct audit/history trail
- ☐ Edge: payment cannot be changed by role without members.payment
- ☐ Edge: payment history handles empty result set
- ☐ Edge: export after filters includes only filtered records
- ☐ Edge: invalid/duplicate membership term is rejected
- ☐ Edge: activating a new term does not erase old term records

ICpEP.SE QA Feature Testing Checklist

- ☐ Edge: registration open/close changes are visible on public form after refresh
- ☐ Edge: payment totals do not count archived/unpaid records incorrectly

EXPORTS AND FILE DOWNLOADS

- ☐ CSV export downloads and opens with expected columns
- ☐ Excel export downloads and opens with expected columns
- ☐ PDF export downloads and displays correctly
- ☐ Formal picture download opens/downloads correctly
- ☐ E-signature download opens/downloads correctly
- ☐ Unauthorized users cannot download protected member files
- ☐ Edge: export with zero records still creates valid file or clear message
- ☐ Edge: export with many records completes without timeout
- ☐ Edge: exported special characters display correctly
- ☐ Edge: exported data respects selected term/filter
- ☐ Edge: missing private file shows controlled error
- ☐ Edge: direct file URL without session is denied

EVENT SCHEDULING

- ☐ Calendar page loads events
- ☐ Month/week/day navigation works as expected
- ☐ Create event saves title, category, date/time, venue, and description
- ☐ Edit event updates existing event correctly
- ☐ Delete event removes it from calendar
- ☐ Event status changes save correctly
- ☐ End date/time displays correctly
- ☐ View-only roles can see calendar but cannot modify events
- ☐ Edge: start date after end date is rejected
- ☐ Edge: missing required title/date/category is rejected
- ☐ Edge: overlapping events follow expected policy
- ☐ Edge: very long title/venue/description displays safely
- ☐ Edge: past event creation/update follows expected policy
- ☐ Edge: event crossing midnight displays correctly
- ☐ Edge: timezone/date boundary is correct for Asia/Singapore
- ☐ Edge: deleting event with attendance is blocked or preserves records as expected
- ☐ Edge: calendar handles empty month/week cleanly

EVENT SHARING AND ATTENDANCE

- ☐ Secretary/authorized role can generate shared event link

ICpEP.SE QA Feature Testing Checklist

- ☐ Shared event page loads with valid token
- ☐ Invalid/revoked/expired token shows unavailable page
- ☐ Shared event shows QR/code only when event is shareable
- ☐ Attendance credentials display correctly
- ☐ Officer check-in page loads event info
- ☐ QR scanner can scan a valid attendance QR
- ☐ Manual attendance code check-in works
- ☐ Invalid QR/code is rejected
- ☐ Duplicate check-in is handled properly
- ☐ Attendance roster lists expected users
- ☐ Manual attendance status update saves correctly
- ☐ Unauthorized roles cannot access restricted roster actions
- ☐ Edge: revoked shared link stops working immediately
- ☐ Edge: regenerated share link invalidates old link if expected
- ☐ Edge: attendance for deleted/cancelled event is blocked
- ☐ Edge: check-in before allowed time is blocked or handled as expected
- ☐ Edge: check-in after event ends follows expected policy
- ☐ Edge: camera permission denied still allows manual code path
- ☐ Edge: malformed QR/token does not crash scanner/page
- ☐ Edge: same user cannot be counted twice
- ☐ Edge: manual roster update creates accurate activity/audit record
- ☐ Edge: user not assigned to roster/role is handled correctly

USER MANAGEMENT AND RBAC

- ☐ Users page loads only for users.manage roles
- ☐ Create user works with valid role and account details
- ☐ Duplicate email/username is rejected
- ☐ Edit user updates name, email, username, role, and status
- ☐ Deactivate user prevents future login
- ☐ Reactivate user restores access
- ☐ Reset password marks user for password change
- ☐ Role badges and role family grouping display correctly
- ☐ Privileges modal shows role-to-permission matrix
- ☐ Updating role permissions changes UI/API access correctly
- ☐ Reset role privileges restores default permissions
- ☐ Edge: user cannot remove own critical access if policy forbids it
- ☐ Edge: deactivated user with active session loses access after refresh/request

ICpEP.SE QA Feature Testing Checklist

- ☐ Edge: changing a role updates permissions without requiring database corruption fixes
- ☐ Edge: invalid role value is rejected by API
- ☐ Edge: duplicate username with different casing follows expected policy
- ☐ Edge: reset password cannot expose generated password except intended flow
- ☐ Edge: role with no permission sees only allowed pages
- ☐ Edge: direct API calls still enforce RBAC even if UI button is hidden

ACTIVITY LOGS AND SECURITY

- ☐ Activity log page loads for authorized admin users
- ☐ Login/logout, create, update, delete, restore, payment, and schedule actions are recorded
- ☐ Activity entries show actor name, role, IP, timestamp, and action details
- ☐ Activity filters/search work if available
- ☐ Sensitive secrets/passwords are never shown in logs
- ☐ API rejects unauthenticated admin requests
- ☐ API rejects unauthorized role actions with proper status/message
- ☐ CSRF protection blocks unsafe requests without token
- ☐ Uploaded private files are not publicly accessible without authorization
- ☐ Edge: failed validation attempts do not leak sensitive details
- ☐ Edge: deleted actor/member names still display safely in logs
- ☐ Edge: activity log handles large history with pagination
- ☐ Edge: session expiry during a write does not partially update silently
- ☐ Edge: malicious text/script input is escaped in UI and exports
- ☐ Edge: protected endpoints reject wrong HTTP method
- ☐ Edge: private storage errors do not expose credentials/paths

CROSS-BROWSER AND RESPONSIVE QA

- ☐ Chrome desktop works
- ☐ Edge desktop works
- ☐ Mobile viewport works at 375px width
- ☐ Tablet viewport works around 768px width
- ☐ Forms remain usable on small screens
- ☐ Tables/lists do not overflow awkwardly
- ☐ Modals fit screen and can be closed
- ☐ No overlapping text/buttons in major pages
- ☐ Keyboard tab navigation reaches interactive controls
- ☐ Visible focus states appear on buttons/inputs
- ☐ Error, loading, and empty states are understandable

ICpEP.SE QA Feature Testing Checklist

- ☐ Edge: landscape mobile orientation remains usable
- ☐ Edge: browser zoom at 125 percent remains readable
- ☐ Edge: reduced motion setting does not break animations
- ☐ Edge: refresh on nested admin pages works
- ☐ Edge: direct URL to detail/edit/shared pages works or fails gracefully

FINAL SIGN-OFF

- ☐ All critical paths passed
- ☐ All edge cases passed or documented
- ☐ All failed items have issue/ticket numbers
- ☐ Retest completed after fixes
- ☐ QA lead reviewed open known issues
- ☐ Product owner/admin accepted release candidate
